

EXPERIMENT NO: 1

Title

Create a Simple Cloud Software Application and Provide it as a Service Using Zoho Creator to Demonstrate Software as a Service (SaaS)

Aim

To create a simple cloud software application using **Zoho Creator** and provide it as a service through the cloud to demonstrate the **Software as a Service (SaaS)** model.

Procedure

Step 1: Open a web browser and go to Zoho Creator.

Step 2: Sign in to your Zoho account using your login credentials.

Step 3: From the Zoho applications, select **Zoho Creator**.

Step 4: Click **Create New Application** and enter the application name, for example, **Student Task Manager**.

Step 5: Create the new application.

Step 6: Create a new **Form** and add fields such as Task Name, Description, Due Date, and Status.

Step 7: Save the form and enter sample task details.

Step 8: Create a report to display the submitted task records.

Step 9: Test the application through a web browser.

Step 10: Access the application through its cloud URL.

Application Used

Zoho Creator

Cloud Service Model

Software as a Service (SaaS)

Features of the Application

- Cloud-based application
- Accessible through a web browser
- No software installation required
- Stores data in the cloud

- Supports multiple users
- Easy to update and maintain

OUTPUT:

The screenshot displays a web application interface for 'student records'. The top navigation bar includes the application name, a 'Development' environment indicator, and user controls like 'View as' and 'Trial expires in 3 days'. A dark sidebar on the left contains a menu with 'Tasks' and 'Tasks Report'. The main content area, titled 'Tasks', contains a form with the following fields:

- Description:** A large text input field.
- due date:** A date input field with a placeholder 'dd-MMM-yyyy'.
- File upload:** A button labeled 'Select File' with an upload icon.
- status:** A dropdown menu currently showing '-Select-'.
- priority:** A dropdown menu currently showing 'Choice 3'.
- Task Name:** A text input field.

A blue 'Submit' button is located at the bottom of the form. The bottom of the sidebar shows the user's profile 'Habeeb C' and notification icons.

Result

A simple cloud software application was successfully created using **Zoho Creator** and provided as a **Software as a Service (SaaS)** application.

EXPERIMENT NO: 2

Title

Create a Simple Cloud Software Application for Flight Reservation System Using Zoho Creator to Demonstrate SaaS

Date: _____

Aim

To create a simple cloud-based **Flight Reservation System** using **Zoho Creator** and provide it as a Software as a Service (SaaS) application.

Procedure

Step 1: Open a web browser and go to Zoho Creator.

Step 2: Sign in to the Zoho account.

Step 3: Click **Create New Application**.

Step 4: Enter the application name as **Flight Reservation System**.

Step 5: Create a new **Flight Reservation Form**.

Step 6: Add fields such as Passenger Name, Email, Phone Number, Source, Destination, Travel Date, Number of Passengers, and Class.

Step 7: Save the form.

Step 8: Create a report to display the flight reservation details.

Step 9: Enter sample passenger and flight details.

Step 10: Test the reservation application through the web browser.

Step 11: Share/access the application through the generated cloud URL.

Application Used

Zoho Creator

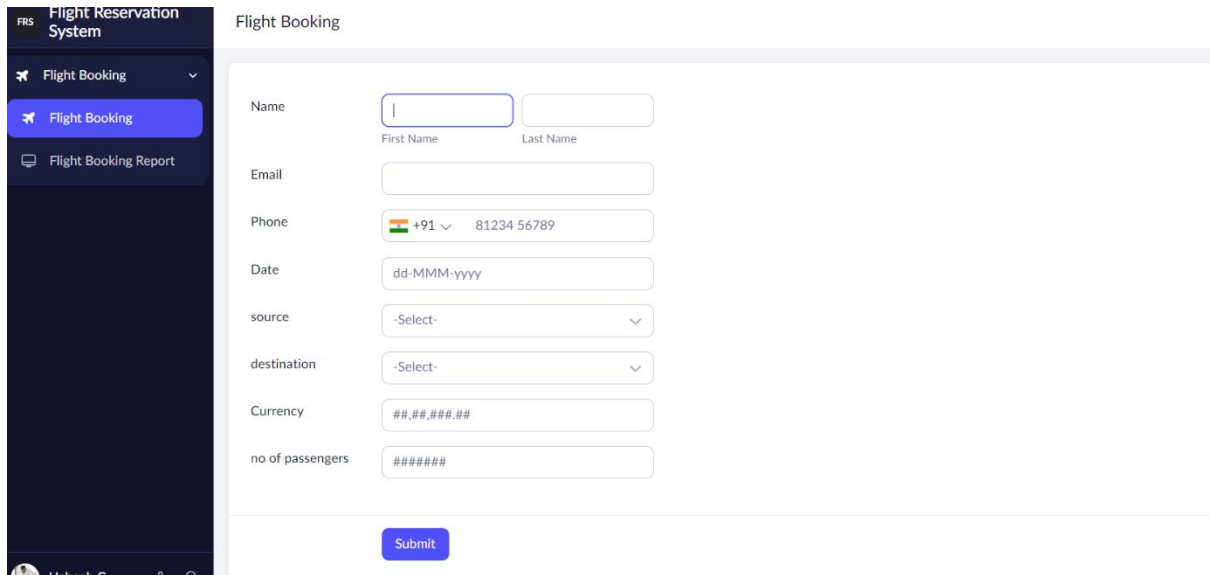

Cloud Service Model

Software as a Service (SaaS)

Features of the Application

- Online flight reservation
- Passenger information management
- Source and destination selection
- Travel date management
- Passenger count

- Flight class selection
- Cloud-based data storage
- Browser-based access

The screenshot displays the 'Flight Reservation System' (FRS) interface. On the left is a dark sidebar with a menu containing 'Flight Booking' (selected) and 'Flight Booking Report'. The main area is titled 'Flight Booking' and contains a form with the following fields:

- Name:** Two input fields for 'First Name' and 'Last Name'.
- Email:** A single input field.
- Phone:** An input field with a country code dropdown (currently showing '+91') and a phone number '81234 56789'.
- Date:** An input field with a date format 'dd-MMM-yyyy'.
- source:** A dropdown menu with '-Select-' as the placeholder.
- destination:** A dropdown menu with '-Select-' as the placeholder.
- Currency:** An input field with a format '##,##,###,###'.
- no of passengers:** An input field with a format '#####'.

A blue 'Submit' button is located at the bottom of the form.

Result

A simple **Flight Reservation System** was successfully created using **Zoho Creator** and provided as a **SaaS application**.

EXPERIMENT NO: 3

Title

Create a Simple Cloud Software Application for Property Buying & Rental Process in Chennai City Using Zoho Creator to Demonstrate SaaS

Date: _____

Aim

To create a cloud-based **Property Buying and Rental Application for Chennai City** using **Zoho Creator** and demonstrate the Software as a Service (SaaS) model.

Procedure

Step 1: Open a web browser and go to Zoho Creator.

Step 2: Sign in to the Zoho account.

Step 3: Select **Zoho Creator** from the Zoho applications.

Step 4: Click **Create New Application**.

Step 5: Enter the application name as **Chennai Property Management System**.

Step 6: Create a new **Property Form**.

Step 7: Add fields such as Property Name, Property Type, Location, Area, Number of Bedrooms, Purpose, Price, Owner Name, and Contact Number.

Step 8: Add Chennai locations such as Tambaram, Anna Nagar, Porur, OMR, Adyar, and Velachery.

Step 9: Save the form and enter sample property details.

Step 10: Create a report to display available properties.

Step 11: Create filters for **Buy** and **Rent** properties.

Step 12: Test the application through a web browser.

Step 13: Access the application using the cloud URL.

Application Used

Zoho Creator

Cloud Service Model

Software as a Service (SaaS)

Features of the Application

- Chennai property listing
- Property buying option
- Property rental option

- Location-based property details
- Property type management
- Price information
- Owner contact details
- Cloud-based data storage
- Online access

The screenshot displays a mobile application interface for 'property buyer and rental'. On the left, a dark blue sidebar contains a menu with 'name form' and 'name form Report'. The main content area is white and titled 'name form'. It contains a form with the following fields:

- Name:** Two input fields for 'First Name' and 'Last Name'.
- Email:** A single input field.
- Phone:** An input field with a dropdown for country code (showing '+91') and a text input for the number (showing '81234 56789').
- location:** A single input field.
- Image:** A button labeled 'Select Image' with an upload icon.
- Video:** A button labeled 'Select File' with an upload icon and a camera icon.
- property type:** A dropdown menu showing '-Select-'.
- property type 2:** A dropdown menu showing '-Select-'.
- value:** An input field containing '#####'.

Result

A cloud-based **Property Buying and Rental Application for Chennai City** was successfully created using **Zoho Creator** and provided as a SaaS applicati

EXPERIMENT NO: 4

Title

Create a Simple Cloud Software Application for Car Booking Reservation System Using Zoho Creator to Demonstrate SaaS

Date: _____

Aim

To create a simple cloud-based **Car Booking Reservation System** using **Zoho Creator** and demonstrate the Software as a Service (SaaS) model.

Procedure

Step 1: Open a web browser and access Zoho Creator.

Step 2: Sign in to the Zoho account.

Step 3: Click **Create New Application**.

Step 4: Enter the application name as **Car Booking Reservation System**.

Step 5: Create a new **Car Booking Form**.

Step 6: Add fields such as Customer Name, Phone Number, Car Model, Car Type, Pickup Location, Drop Location, Booking Date, Return Date, and Number of Passengers.

Step 7: Add available car models and their rental details.

Step 8: Save the form.

Step 9: Create a report to display the booking details.

Step 10: Enter sample customer and booking information.

Step 11: Test the booking application.

Step 12: Access the application through the generated cloud URL.

Application Used

Zoho Creator

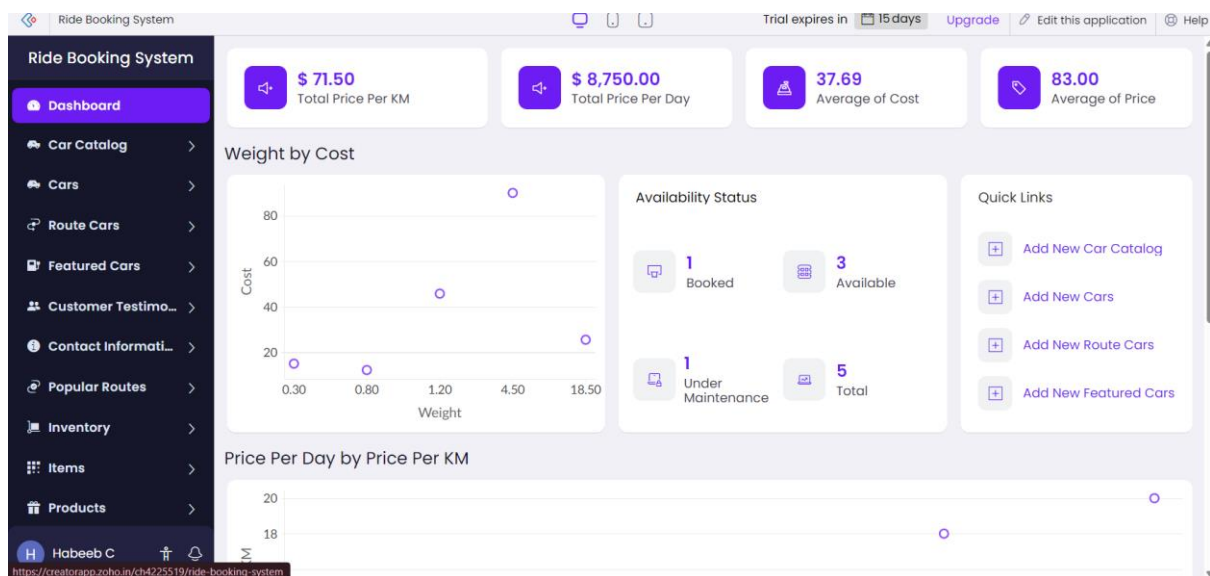

Cloud Service Model

Software as a Service (SaaS)

Features of the Application

- Online car booking
- Customer information management
- Car model selection
- Pickup and drop location
- Booking date management
- Return date management
- Passenger information
- Cloud-based booking records

- Browser-based access

Result

A simple **Car Booking Reservation System** was successfully created using **Zoho Creator** and provided as a SaaS application.

EXPERIMENT NO: 5

Title

Create a Simple Cloud Software Application for Library Book Reservation System for SIMATS Library Using Zoho Creator to Demonstrate SaaS

Aim

To create a simple cloud-based **Library Book Reservation System for SIMATS Library** using **Zoho Creator** and demonstrate the Software as a Service (SaaS) model.

Procedure

Step 1: Open a web browser and access Zoho Creator.

Step 2: Sign in to the Zoho account.

Step 3: Click **Create New Application**.

Step 4: Enter the application name as **SIMATS Library Book Reservation System**.

Step 5: Create a new **Book Reservation Form**.

Step 6: Add fields such as Student Name, Register Number, Department, Book Title, Author, Book ID, Reservation Date, Return Date, and Status.

Step 7: Add available books to the application.

Step 8: Save the form.

Step 9: Create a report to display the book reservation records.

Step 10: Enter sample student and book details.

Step 11: Test the book reservation process.

Step 12: Access the application through the generated cloud URL.

Application Used

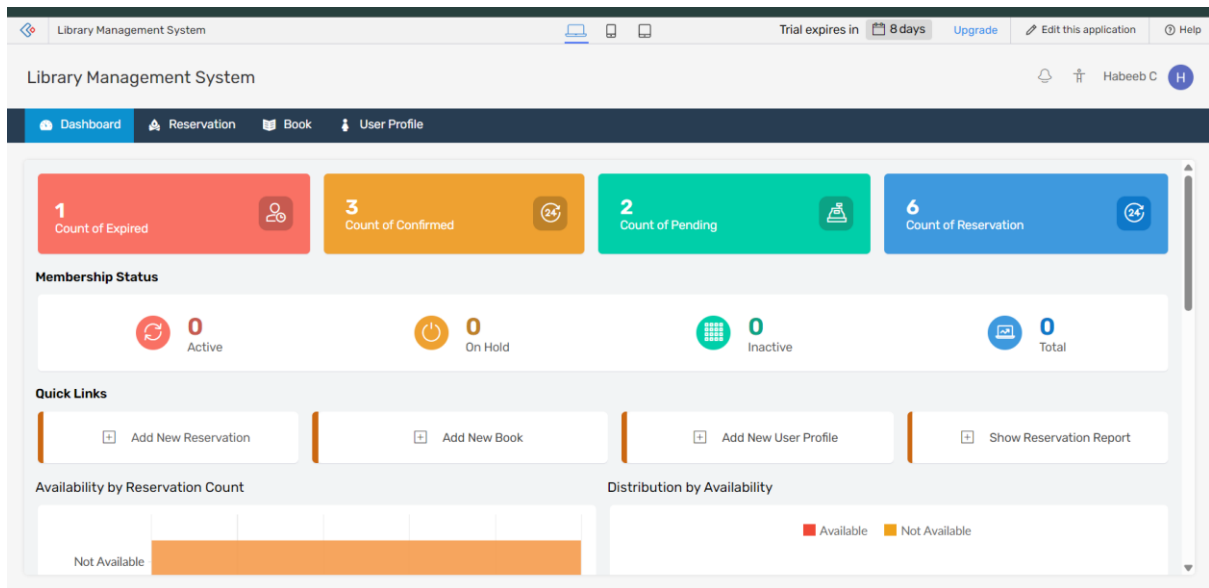

Zoho Creator

Cloud Service Model

Software as a Service (SaaS)

Features of the Application

- Online book reservation
- Student information management
- Book information management
- Book ID tracking
- Reservation date
- Return date
- Book availability status
- Cloud-based records
- Browser-based access

Result

A simple **SIMATS Library Book Reservation System** was successfully created using **Zoho Creator** and provided as a SaaS application.

EXPERIMENT NO: 6

Title

Create a Simple Cloud Software Application for Product Selling Using Zoho Creator to Demonstrate SaaS

Aim

To create a simple cloud-based **Product Selling Application** using **Zoho Creator** and demonstrate the Software as a Service (SaaS) model.

Procedure

Step 1: Open a web browser and access Zoho Creator.

Step 2: Sign in to the Zoho account.

Step 3: Click **Create New Application**.

Step 4: Enter the application name as **Online Product Selling System**.

Step 5: Create a new **Product Form**.

Step 6: Add fields such as Product Name, Product ID, Category, Description, Price, Quantity, Customer Name, Customer Email, and Contact Number.

Step 7: Add sample products to the application.

Step 8: Create an **Order Form** for customers.

Step 9: Add fields such as Customer Name, Product Name, Quantity, Order Date, and Payment Status.

Step 10: Create a report to display products and customer orders.

Step 11: Enter sample product and order details.

Step 12: Test the product selling application through a web browser.

Step 13: Access the application using the generated cloud URL.

Application Used

Zoho Creator

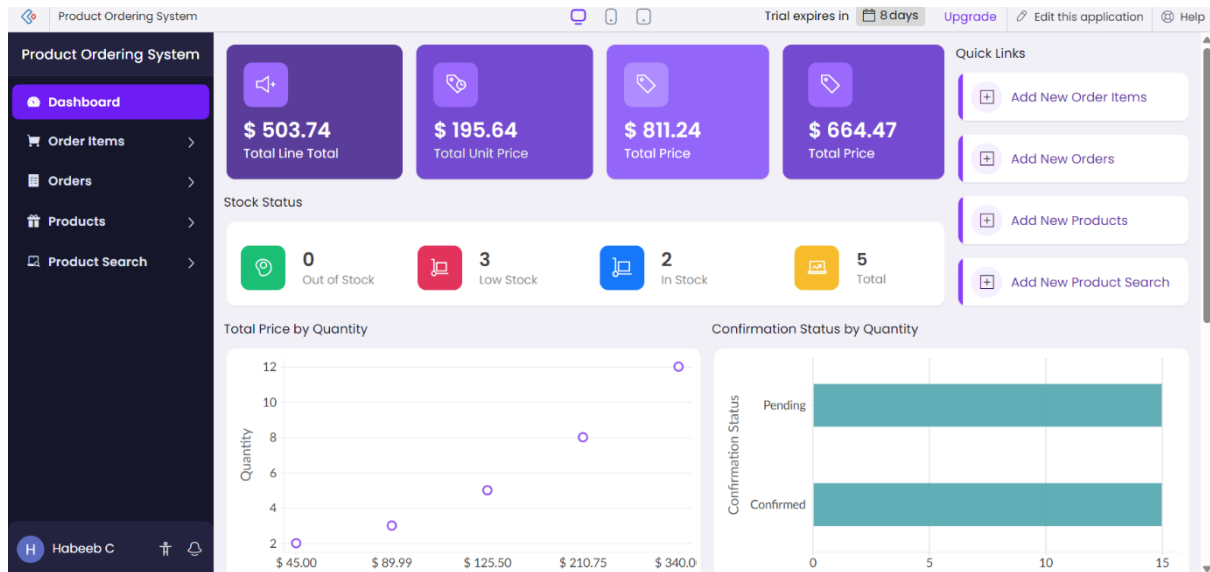

Cloud Service Model

Software as a Service (SaaS)

Features of the Application

- Online product listing
- Product category management
- Product price management
- Product quantity management
- Customer information
- Order management
- Payment status
- Cloud-based data storage
- Browser-based access

- Easy maintenance

Result

A simple **Product Selling Application** was successfully created using **Zoho Creator** and provided as a **Software as a Service (SaaS)** application.
